

Field Technician

Armach Robotics, Inc. is revolutionizing ship husbandry using autonomous robots and artificial intelligence. Through a subscription service, Armach robots continuously clean ship hulls and provide regular hull surveys. Clean ship hulls result in substantially reduced operating costs, lower carbon emissions, and reduced environmental impacts while regular survey data provides the intelligence ship owners need to make on-time maintenance decisions. Using robots that are resident on ships and within ports and harbors that are supervised by remote operations specialists, Armach's service is scalable worldwide at a fraction of the cost required by traditional husbandry methods.

Armach is currently seeking a dynamic, top performer for a fast-paced technical environment. The ideal candidate is excited to solve really hard problems, dedicated to 'getting it done,' and confident enough to work independently alongside the best of the best.

Job Description

The Field Technician is responsible for tendering and piloting Armach's Hull Service Robot (HSR) in a safe and efficient manner. The candidate should be competent in the maintenance and repair of all electronic, electrical, mechanical, and sub-systems associated with the vehicle. This includes component repair, replacement, and troubleshooting. The majority of operations will take place at major ports and harbors around the country and will require a significant amount of traveling. This includes driving a control van that is specially outfitted for the vehicles. The Field Technician will report directly to the Field Supervisor.

Responsibilities

- Piloting and tendering remote vehicles.
- Participate in familiarization and debriefing sessions prior to mobilization/demobilization.
- Carry out Preventive Maintenance on vehicles per Armach's planned maintenance plan.
- Evaluate system maintenance schedules and advise the Supervisor of any technical matters, needs, and upgrades.
- Establish and maintain parts and supplies associated with all electrical and electronic devices.
- Maintains parts and supplies inventory associated with all systems.
- Assist in the post-processing of all data collected during operation to build out field reports.
- Ensure that internal/external Health, Safety, Environment, and Quality requirements are adhered to at all times.
- Assist the engineering department with testing and data collection at our test facility in Cape Canaveral, FL.
- All other responsibilities as reasonably assigned.

Requirements

- High School Diploma or GED.
- Qualified and Experienced in ROV Operations as a Technician (1+ Years).
- Proven track record in ROV operations.
- Working knowledge of the Maritime Industry.
- Strong computer skills including experience in Linux and Windows.
- Ability to assist in driving the operations van for 6+ hours to different job locations.
- Ability to travel for 5+ days at a time, sometimes at short notice.
- Must have a valid driver's license and submit a driving record for the past three years.
- Must be able to obtain a valid Passport and Transportation Worker Identification Credential (TWIC Card).
- Must be able to obtain security clearance.
- Excellent organizational skills, capable of prioritizing jobs depending on job requirements.
- The ability to work successfully as a team member. Must be easygoing, hardworking, have great communication skills, willing and able to work with clients, and field crews.
- Ability to work in all weather conditions: rain, sleet, storm, snow, heat, etc.

To apply, please send your resume, salary requirements, and cover letter to careers@armachrobotics.com as PDF documents. The candidate must be eligible to work in the United States. The ideal candidate is located near Rockledge, FL. This role will require significant travel, both in- and out-of-state.
